1. Introduction

The HR Applicant Processing System is a Windows-based desktop application designed to support two types of users: Applicants, who can manage their job applications and documents, and HR Personnel who can oversee the full recruitment process. This manual covers the Dashboard screens for both user types and explains the purpose of each button and element visible on those screens.

2. Applicant Dashboard

The Applicant Dashboard is the first screen an applicant sees after logging in. It gives the applicant a quick overview of their current application status, any missing documents, and upcoming interview informations. Navigation to all applicant functions are done through the sidebar on the left side of the screen.

2.1 Summary Cards (Top Center)

There are three summary cards displayed at the top of the main area. These cards give the applicant a fast look at their current standing in the application process without needing to open any other screen.

Button / Element	Description
------------------	-------------

STATUS	Shows the applicants current application status (for example: Draft, Submitted, Under Review, For Interview, Accepted, Rejected). The label updates automatically based on what the HR team has set.
MISSING	Displays the number of required documents that have not yet been submitted. If this shows a number greater than zero, the applicant should go to My Documents to upload the missing files.
INTERVIEW	Shows whether an interview has been scheduled. If an interview is set it will display the date or status (such as, "Scheduled", "Pending"). If none has been set yet it'll just appear blank.

2.2 Recent Updates

The Recent Updates section in the middle of the screen shows the latest changes or notifications related to the applicants application. This could include status changes, document requests, or messages from HR. It refreshes every time the page loads.

2.3 Sidebar Navigation Buttons

The left sidebar contains buttons that let the applicant move between the different sections of the system. Clicking any of these buttons opens the corresponding screen.

Button / Element	Description
MY PROFILE	Opens the applicant's personal profile page where they can view and update their basic information such as name, email address, phone number, and address.
JOB VACANCIES	Shows the list of currently available job positions posted by HR. Applicants can browse the openings and choose to apply for a position from here.
MY APPLICATIONS	Takes the applicant to the My Application Page, which shows all the details of their submitted application including the job position, personal information, and current status. The applicant can also edit their application here if its still in Draft or Submitted status.
MY DOCUMENTS	Opens the documents section where the applicant can upload or view their submitted requirements (such as, resume, certificates, IDs, etc.). This is also where the applicant can see which documents are still missing.
APPLICATION STATUS	Opens a detailed timeline view of the applicant's recruitment progress showing every status change from initial submission up to the current point in the process.

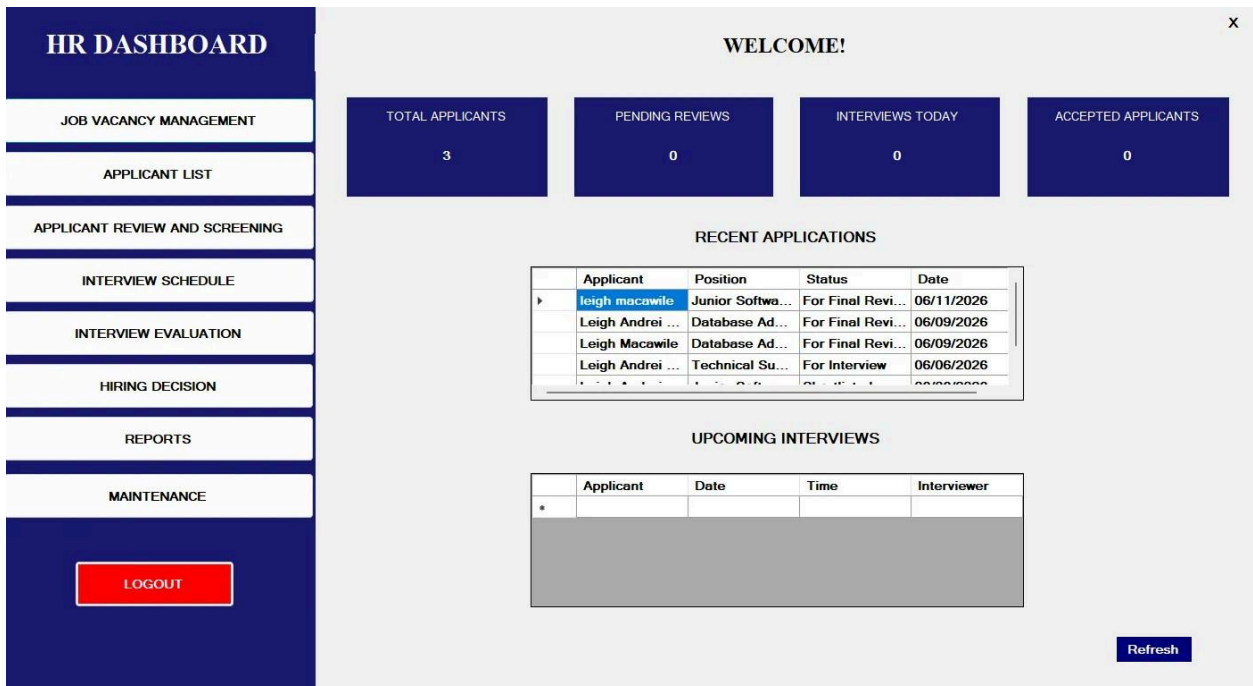

2.4 Other Controls

Button / Element	Description
Refresh	Located at the bottom-right of the screen. Clicking this manually reloads the dashboard data so the summary cards and recent updates reflect the latest information from the database.
LOGOUT	Located at the bottom of the sidebar. Clicking this logs the current applicant out of the system and returns to the login screen. Make sure to save any changes before clicking logout.

Note: All buttons in the sidebar are only accessible to logged-in applicants. The system will not show another applicants data.

3. HR Dashboard

The HR Dashboard is the main control center for HR personnel after they log in. It provides a summary of all recruitment activity and quick access to all HR management modules through the sidebar. The dashboard is designed to give HR staff a fast overview of where things currently stands across all applicants.

3.1 Summary Cards (Top Center)

Four summary cards are displayed across the top of the main content area. These update automatically each time the dashboard loads or is refreshed.

Button / Element	Description
TOTAL APPLICANTS	Shows the total number of applicants that are currently registered and have submitted applications in the system.
PENDING REVIEWS	Displays how many applications are currently waiting to be reviewed by HR.
INTERVIEWS TODAY	Shows the number of interviews that are scheduled for the current date. Helps HR quickly know how many candidates they need to prepare for that day.
ACCEPTED APPLICANTS	Displays how many applicants have been marked as accepted or hired. Useful for tracking how many positions have already been filled.

3.2 Recent Applications Table

The Recent Applications table in the center of the screen shows the latest applications submitted to the system. Each row shows the applicants name, the position they applied for, their current status, and the date of their application. Clicking on a row (like the highlighted entry in the screenshot) may select that applicant for further actions depending on the HR setup.

3.3 Upcoming Interviews Table

Below the Recent Applications table is the Upcoming Interviews section. This table lists scheduled interviews with the applicant's name, interview date, time, and the assigned interviewer. If no interviews are scheduled yet, the table will appear empty.

3.4 Sidebar Navigation Buttons

The sidebar on the left provides access to all HR management modules. Each button opens a different section of the system for HR staff to perform their tasks.

Button / Element	Description
JOB VACANCY MANAGEMENT	Opens the module where HR can create, edit, or remove job postings. HR can set the job title, description, requirements, and number of openings available.
APPLICANT LIST	Shows a complete list of all registered applicants in the system. HR can view applicant details and access their individual profiles from here.
APPLICANT REVIEW AND SCREENING	Opens the screening module where HR can review submitted applications, check uploaded documents, and update each applicants status. This is useful incase HR needs to move an applicant from Submitted to Under Review.
INTERVIEW SCHEDULE	Allows HR to schedule interview appointments for applicants who have passed the initial screening. HR can set the date, time and interviewer for each session.
INTERVIEW EVALUATION	Opens the evaluation form where interviewers can record their feedback and scores for each applicant after the interview is done.
HIRING DECISION	Lets HR record the final decision for each applicant whether they are accepted, rejected, or placed on hold. This updates the applicants status accordingly.
REPORTS	Opens the reports module where HR can generate and view summaries of recruitment data, such as total applicants per position, acceptance rates, and other statistics.
MAINTENANCE	Provides access to system settings and maintenance tools, such as managing user accounts, updating dropdown options (such as, job positions, departments), and other admin configurations.

3.5 Other Controls

Button / Element	Description
Refresh	Located at the bottom-right corner. Reloads all dashboard data including the summary cards, Recent Applications table, and Upcoming Interviews table to show the latest information.
LOGOUT	Located at the bottom of the sidebar. Logs the HR user out of the system and redirects back to the login screen.
X (Close)	The close button at the top-right corner of the window. Closes the application entirely.

Note: *HR accounts have full access to all modules in the sidebar. Regular applicant accounts do not have access to the HR Dashboard.*
